DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hayashi et al (6,468,169). Regarding claim 1, Hayashi discloses a four-piece golf ball comprising a core, an enclosure layer, an inner cover layer, and an outer cover layer (fig 1). The enclosure layer is equivalent to applicant's intermediate layer and the inner cover layer is equivalent to applicant's outer layer. The core has a diameter from 20 to 37 mm and a Shore D hardness from 15 to 55 (JIS-A 77 to 96). The enclosure layer has a Shore D hardness from 40 to 70. The inner cover layer is made from a thermoplastic resin and has a Shore D hardness from 55 to 70. The outer cover layer has a Shore D hardness from 40 to 60 and a thickness from 0.3 to 3.0 mm. Regarding claim 2, the core and the enclosure layer can be made from cis 1,4 polybutadiene (col. 4, lines 12-18; col. 5, lines 1-2). Regarding claim 3, the cover layer can be made from a thermoplastic polyurethane. One of ordinary skill in the art would have varied the numbers of the ranges disclosed by Hayashi to achieve the desired properties.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-5 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5 of copending Application No. 10/638,307. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present invention and the '307 application claim golf balls comprising four layer. Each of the limitations are identical except for the limitation regarding the hardness of the outer layer in claim 1. The present invention claims a hardness from 55 to 70, while the '307 application claims a hardness from 65 to 85. Narrowing the range of the hardness of a layer does not render a patentable distinction because the modification is within the capabilities of one skilled in the art.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
